

SLOWWALK

Made in Spain for help the world

**AUTHENTIC 100%
SUSTAINABLE SHOES**

Eco Slow Concept

We are committed to eco-sustainability and aware we must lead by example, we are committed to manufacturing the first truly eco-sustainable footwear with recycled materials.

This way, we will give an example that it's possible to create a clean and respectful with nature fashion. So that eco-sustainability fashion wouldn't become just a fashion but our way of life, in balance with nature.

In Slowwalk we only use biodegradable, certified and respectful materials with our ecosystem, to preserve it.

Made in Spain for help the world

The 4R of Slowwalk recycling

If we manage correctly our objects and waste by adopting an eco-sustainable lifestyle, we will reduce considerably the waste that pollutes our planet, reducing our carbon footprint.

Reduce

Comfortable shoes that last longer. Quality and durability is very important for Slowwalk because we reduce consumption.

Re-use

We reuse rubber from soles to make new ones. Pet bottles and nets, cotton clothes, etc. turned into excellent fabrics.

Recycle

Our shoes are 100% recyclable; their components can be separated to become new shoes or other objects.

Refuse

We refuse to use in our shoes, any materials and components that do not comply with the philosophy of the 4R, to encourage circular economy, do the same and reject them.

SLOW WALK

Made in Spain for
help the world

Our recycled shoes are sold
in: Spain, USA, Canada,
Germany, Belgium, Luxem-
bourg, France, Switzerland,
Austria, Italy, Denmark,
Sweden, Norway, Japan,
Taiwan, Australia, Arabia,

Smart
Design

Every minute one million bottles of plastic are sold in the world, 20.000 per second. There isn't any recycling system able to support such tension. We must start here and now.

EcoFriendly: 1 shoe = 1 bottle less

Manufactured with recycled canvas from plastic bottles and hand sewn soles made of super flexible natural latex. We save raw materials, water, energy and CO2 emissions.

Nothing more eco than the **espadrille**

Espadrilles are the best example of ecological and eco-sensitive footwear, they are a wonder of good design, ideal for summer: fresh, breathable and they adapt to your foot like a glove.

In this Elaborated with **recycled cotton**

We have reinvented them, making them even more comfortable, enhancing their ergonomics and flexibility. Elaborated with recycled cotton, it is the most sustainable and respectful fabric in all its processes and with the same qualities as organic cotton.

HELIOS

Made with organic cellulose and ultra light materials, we have managed to reduce its weight to 120 grams... You will not feel that you are wearing it.
