

The Brand

Slowwalk is an urban brand aimed at a public with a young spirit that demands quality, attractive and comfortable products to wear during their day to day. Adapting classic shoe designs to its own fresh and very natural style; Slowwalk gives a casual and sporty touch to our consumers' daily wardrobe.

The color green is a fundamental part of Slowwalk's soul as a way of unifying the different models in our collection and identifying the brand. Details such as laces or green stitching give the shoe its own personality that reflects the natural spirit of Slowwalk.

Made in Elche

Our hometown is considered the cradle of world footwear, so we are very clear about where the manufacture of Slowwalk has to go to achieve the desired result.

Quality is the basis of all our work at Slowwalk. The good work carried out by designers after several months of intense search for trends must lead to a product with a perfect finish. For this, we have a highly qualified manufacturing team.

Manufacturing

The production process of a shoe like Slowwalk's is complex and laborious since it has many important steps from the creation of the first sketch until the final product is packaged.

We could say that we rely on a traditional process, with many steps done by hand and taking care of all the details in each step. For this and much more, each Slowwalk shoe is unique.

Technology

100%
microfiber

Lining

- 100% breathable microfiber
- Free of chemicals according to Reach Regulation (CE) 1907/2006
- Chromium 6 Free

Skin

Our skins are 100% natural and are finished by hand through dyeing and brushing. That's why no two Slowwalk shoes are the same.
